Document Conventions

Cisco documentation part numbers used in this manual do not include the version number of the document, to avoid updating the manual each time a part number is changed. For example, the documentation part number for the *Regulatory Compliance and Safety Information for the Cisco 6400* is 78-5789-xx.

Command descriptions use these conventions:

- Examples that contain system prompts denote interactive sessions, indicating the commands you should enter at the prompt. The system prompt indicates the current level of the EXEC command interpreter. For example, the prompt `switch#` indicates that you are at the *privileged* level. Access to the privileged level usually requires a password. Refer to the related software configuration and reference publications for additional information.
- Commands and keywords are in **boldface** font.
- Arguments for which you supply values are in *italic* font.
- Elements in square brackets ([]) are optional.
- Alternative but required keywords are grouped in braces ({}) and separated by vertical bars (|).

Examples use these conventions:

- Terminal sessions and sample console screen displays are in `screen` font.
- Information you enter is in **boldface screen** font.
- Nonprinting characters, such as passwords, are in angle brackets (< >).
- Default responses to system prompts are in square brackets ([]).
- An exclamation point (!) at the beginning of a line indicates a comment line.
