

Operating Dial Plans

This section contains information on operating the dial plans in the Cisco EGW 2200 solution.

Operating Dial Rules for Cisco CallManager

The Cisco CallManager uses dial rules to modify dialed numbers. You can find more information about operating dial rules for your Cisco CallManager in these sections of the following documents:

- [Cisco CallManager Administration Guide, Release 4.0\(1\)](#)
 - [Updating a Dial Rule](#)
 - [Deleting a Dial Rule](#)
 - [Reprioritizing a Dial Rule](#)
- [Cisco CallManager Administration Guide, Release 4.1\(2\)](#)
 - [Updating a Dial Rule](#)
 - [Deleting a Dial Rule](#)
 - [Reprioritizing a Dial Rule](#)

Operating Dial Plans for Cisco EGW 2200

You can view and modify the contents of your dial plans, using the Cisco EGW Administration application.

Viewing a Dial Plan

From the Viewing a Dial Plan window, you can view your dial plans. For a detailed explanation of how to perform this procedure, refer to the *Viewing a Dial Plan* section of the Cisco EGW Administration online help system.

Updating a Dial Plan

From the Updating a Dial Plan window, you can modify a dial plan. For a detailed explanation of how to perform this procedure, refer to the *Updating a Dial Plan* section of the Cisco EGW Administration online help system.
