

SBus Adapter Driver Version 3.2 for SunOS 4.1.x Release Note

Supplement to DOC-SBUSUG1 (Document Number 78-1277-01)

Introduction

This release note describes the features, modifications, and caveats of the Copper Distributed Data Interface (CDDI) and Fiber Distributed Data Interface (FDDI) SBus adapters. Refer to the *Workgroup CDDI/FDDI SBus Adapter User Guide* for detailed information about the Workgroup SBus adapter.

Product Overview

The Workgroup SBus adapters are high-performance cards that connect a SPARCstation or SPARCserver to a CDDI or FDDI ring. The adapter provides a single attachment station (SAS) or dual attachment station (DAS) connection that is compliant with Station Management (SMT) 6.2 or 7.3. Refer to the chapter "Product Overview," of the *Workgroup CDDI/FDDI SBus Adapter User Guide* for further explanation of product features and functions.

Features

The following new features have been added to the SBus Adapter Driver software version 3.2:

- 1 Support for SMT Revision 6.2 or 7.3 with turbo and SMT 6.2 for nonturbo SBus adapters.
Table 1 is a matrix showing the correct flashcode file name to be downloaded depending on your SMT version and adapter card type.

Table 1 Flashcode File Matrix

File Name	SMT Version	Adapter Card Type	Product Number
sbus26.rom	6.2	Nonturbo	WA-C300, WA-C301M, WA-C303, WA-C305, WA-C306M, WA-C308
sbus36.rom	6.2	Turbo	WA-C301T, WA-C303T, WA-C306T, WA-C308T
sbus42.rom	7.3	Turbo	WA-C301T, WA-C303T, WA-C306T, WA-C308T

The appendix “Download Utilities” describes how to use the `download_flash` utility to update the firmware on the SBus adapter.

The README file on the SBus Adapter Driver for SunOS 4.1.x diskette contains detailed descriptions and configuration instructions for the following features:

- 2 Support for SMT revision 6.2 or 7.3.
- 3 Sunlink OSI 7.0.1 support (see the README file for the required Sun patch).
- 4 Sunlink DNI 7.0.1 support (see the README file for the required Sun patch).
- 5 IPT uShare Appletalk Version 4.0, Phase 2 support.
- 6 Support for Helios EtherShare 2.2 AppleTalk package.
- 7 Support for netatalk 1.3.
- 8 Novell IPX support.
- 9 Sunlink NetWare 1.0 IPX support.
- 10 IP Multicasting support to work with SunOS Multicast kernel as per RFC 1054.

Cisco Information Online

Cisco Information Online (CIO) provides online information and electronic services to Cisco customers and business partners. Basic CIO services include general Cisco information, product announcements, brochures, descriptions of service offerings, and download access to public and authorized files. Customers with maintenance contracts receive a much broader offering, including technical tips, software updates, the Bug Navigator, configuration notes, release notes, and e-mail access to Cisco Technical Assistance Centers.

CIO serves a wide variety of users through two interfaces that are updated and enhanced simultaneously: a character-based version and a multimedia version that resides on the World Wide Web (WWW). The character-based CIO (called "CIO Classic") supports Zmodem, Kermit, Xmodem, FTP, Internet e-mail, and fax download options, and is excellent for quick access to information over lower bandwidths. The WWW version of CIO provides richly formatted documents with photographs, figures, graphics, and video, as well as hyperlinks to related information.

To access CIO:

* **WWW:** <http://www.cisco.com>

* **Telnet:** [cio.cisco.com](telnet://cio.cisco.com) (198.92.32.130)

* **Modem:** *North America*, 415 903-8070; *Europe* 331 64 46 40 82.

Use the following terminal settings: VT100, N81, up to 14.4 kbps.

Maintenance customers and partners can self-register to obtain full access. For a copy of CIO's Frequently Asked Questions, send e-mail to cio-help@cisco.com. For additional information, send e-mail to cio-team@cisco.com.

This document is to be used in conjunction with the publication *Workgroup CDDI/FDDI SBus Adapter User Guide*.
