

Cisco IOS Release 12.1(1)DA for Cisco DSLAMs with NI-2 Does Not Support CDM

May 26, 2000

Cisco IOS Release 12.1(1)DA does not support the Cisco DSL Manager (CDM) software.

If you are using CDM software to manage your existing DSLAM network:

- Do not upgrade the DSLAMs to Cisco IOS Release 12.1(1)DA.
- Spare NI-2 cards are shipped with the most recent release of Cisco IOS software. Therefore, if you install a spare NI-2 in a network that uses CDM, you might need to install an older version of the Cisco IOS software on the spare NI-2. Cisco IOS Release 12.0(8)DA4 and earlier versions are compatible with CDM.

Go to the Software Center on CCO to download back versions of Cisco IOS software.

You can find the most current Cisco IOS documentation, including release notes, on Cisco Connection Online (CCO). These electronic documents may contain updates and modifications made after the hard copy documents were printed.
