Cisco ONS 15454 and Cisco ONS 15327 Common TL1 Commands Release 3.4

This guide lists TL1 commands and autonomous messages by category. It includes basic descriptions and input and output formats supported by the Cisco ONS 15454 and the Cisco ONS 15327, Release 3.4. Refer to the *Cisco ONS 15454 and Cisco ONS 15327 TL1 Command Guide, Release 3.4* for a complete description of TL1 commands.

TL1 commands conform to the following syntax:

a:b:c:d:e: ...z;

where:

“a” is the Command Code

“b” is the Target Identifier (TID)

“c” is the Access Identifier (AID) or the User Identifier (UID)

“d” is the Correlation Tag (CTAG)

“e: ...z;” are other positions required for various commands

The TID, AID, and CTAG route and control the TL1 command.

Other parameters provide additional information required to complete the action requested by the command.
