

Installation Checklist

FOR CISCOWORKS BLUE SNA VIEW FOR WINDOWS NT

To ensure complete installation of CiscoWorks Blue SNA View, use the following steps and check the following check boxes as you complete each step:

1

Verify System Requirements

- For information on how to verify that your workstation meets the minimum hardware and software requirements, see Chapter 2 in the *CiscoWorks Blue Maps and SNA View Installation and Administration Guide*.
- For information on how to verify that your mainframe meets the minimum hardware and software requirements, see Chapter 2 in the *CiscoWorks Blue Maps and SNA View Mainframe and Installation Guide*.

2

Collect the Data Required for Installing CiscoWorks Blue SNA View

- You will need to collect some data before you begin installation, such as the location of key programs and the identification of ports. For information on this data, see Chapter 2 in the *CiscoWorks Blue Maps and SNA View Mainframe and Installation Guide*.

3

Install the Mainframe Software

- For information on how to install the mainframe software, see Chapter 2 in the *CiscoWorks Blue Maps and SNA View Mainframe Installation Guide*.

4

Install CiscoWorks Blue SNA View

- Run setup to install CiscoWorks Blue SNA View. Setup should automatically launch from the CD. For information on how to install the product, see the “Installing CiscoWorks Blue SNA View for Windows NT” procedure in Chapter 3 in the *CiscoWorks Blue Maps and SNA View Installation and Administration Guide*.

5

Apply the CiscoWorks Blue SNA View Licenses

- Enter the license key for the SNA View from the license sheet shipped with your CD. For information on how to apply the CiscoWorks Blue SNA View licenses, see Chapter 3 in the *CiscoWorks Blue Maps and SNA View Installation and Administration Guide*. Enter the license key for the SNA View from the license sheet shipped with your CD.

6

Configure CiscoWorks Blue SNA View

- The installation script automatically starts the configuration GUI. If it does not, or if you want to reconfigure after installation, see the “Configuring CiscoWorks Blue after Installation” procedure in Chapter 4 in the *CiscoWorks Blue Maps and SNA View Installation and Administration Guide*.

7

Populate the Database with Router Data

To populate the database with router data, you must first discover the routers. The discovery process discovers and records every device that supports any of the supported protocols. The Administration application should automatically start.

Use the Administration application, as described in the “Adding Devices to the Database” procedure in Chapter 9 in the *CiscoWorks Blue Maps and SNA View Installation and Administration Guide*.

8

Run Verify and then Resolve Errors

After you finish installing and configuring CiscoWorks Blue SNA View and discovering routers for the database, verify that all went successfully. Click **Verify** on the Administration window.

Use the Administration application, as described in the “Launching the Installation Verification Web Page” procedure in Chapter 3 in the *CiscoWorks Blue Maps and SNA View Installation and Administration Guide*.

9

Use the Web Interface

Type the URL of the CiscoWorks Blue web server:

`http://host_name[:port_number]`

Where *host_name* is the name of the host with the CiscoWorks Blue web server. The *port_number* is optional if you use port 80. For example, if your host name is host.cisco.com, and you use port 8080, you would type:

`http://host.cisco.com:8080`

For information on how to get started with SNA View, see the *Quick Start for CiscoWorks Blue SNA View* reference card.

Use Administration and Configuration to Perform Future Configuration Changes

For information on how to perform future configuration changes, such as adding new routers or host connections, see the following chapters in the *CiscoWorks Blue Maps and SNA View Installation and Administration Guide*:

- Chapter 4, “Using CiscoWorks Blue SNA View Configuration for Windows NT.”
- Chapter 9, “Using CiscoWorks Blue SNA View Administration for Windows NT.”

Congratulations

Installation and configuration are complete. Use your local or remote Web browser as the primary interface to use this product. All required services and processes automatically start every time the machine reboots.

For information on how to use CiscoWorks Blue Maps and SNA View, see the *CiscoWorks Blue Maps and SNA View User Guide*.

For information on how to get started with SNA View, see the *Quick Start for CiscoWorks Blue SNA View* reference. Installation and configuration are complete. Use your local or remote Web browser as the primary interface to use this product. All required services and processes automatically start every time the machine reboots.

For information on how to get started with SNA View, see the *Quick Start for CiscoWorks Blue SNA View* reference.
