

Supported Platforms

This appendix lists the features supported in earlier releases of the Cisco protocol translation software that are not supported by Software Release 10.0. If you need any of the features for your networking environment, please contact your sales representative about obtaining earlier versions of the router software.

This software release supports the following protocol translator models:

- The Cisco 2500
- The Cisco 3000
- Protocol translation is also supported on the 500-CS and the ASM-CS communication servers.

This software release does not support the CPT model and the IGS/L, IGS/R, and IGS/TR models.
