

## Blank Worksheets

---

This appendix contains blank Global Configuration and Interface Configuration Worksheets. Use these worksheets to plan your startup configuration and to run through a **setup** command facility session. It is useful to make copies of these blank worksheets in case you rework your configuration or install more than four interfaces on your router.

# Global Configuration Worksheet

## Network Design Information Sheet

System Type: (for example, Cisco 1000, Cisco 4000...): \_\_\_\_\_

System Serial No.: \_\_\_\_\_ Number of Interfaces: \_\_\_\_\_

### Global Parameters

|                            |                                |       |                                  |
|----------------------------|--------------------------------|-------|----------------------------------|
| Host Name:                 |                                |       |                                  |
| Enable Secret:             |                                |       |                                  |
| Enable Password:           |                                |       |                                  |
| Virtual Terminal Password: |                                |       |                                  |
| SNMP:                      | Yes                            | No    | Community String: _____          |
| XRemote Font Server:       | Yes                            | No    |                                  |
|                            | IP Address:                    | _____ |                                  |
|                            | IP Address:                    | _____ |                                  |
|                            | IP Address:                    | _____ |                                  |
|                            | IP Address:                    | _____ |                                  |
| DECnet:                    | Yes                            | No    |                                  |
|                            | Area No.:                      | _____ |                                  |
|                            | Node No.:                      | _____ |                                  |
|                            | Area (Level 2) Routing:        | Yes   | No                               |
| IP:                        | Yes                            | No    |                                  |
|                            | Routing Protocol (choose one): |       |                                  |
|                            | IGRP                           | Yes   | No IGRP Autonomous System: _____ |
|                            | RIP                            | Yes   | No                               |
| IPX:                       | Yes                            | No    |                                  |
